BINDERY · STEP 1 OF 3 · STRUCTURE

Information architecture

Five sections, ordered by how often a bookseller needs them during a shift. These boards fix structure and behaviour only. Visual style comes in step 2.

(1) First release (2) Next release

/

Today

What needs doing before the shop closes?

(1) **Today**
Next action, orders to collect, deliveries due, low stock

(1) **First-run setup**
Same address. A four-step checklist until the shop can take orders

/orders

Orders

Books customers have asked for, from request to collection.

(1) **Order list**
Filter by status, customer, supplier. Search

(1) **Order**
`/orders/:id`
The order trail, customer, book, messages

(1) **New order**
`/orders/new`

(2) **Message customers**
`/orders/ready/notify`
One message to everyone whose book has arrived

/stock

Stock

What is on the shelves, and what needs reordering.

(1) **Stock list**
Filter by section, supplier, low stock. Search by title or ISBN

(1) **Title**
`/stock/:isbn`
Copies, location, sales, reorder level

(1) **Receive delivery**
`/stock/receive`

(2) **Import invoice**
`/stock/import`
Upload, match columns, review rows, confirm

/suppliers

Suppliers

Who you buy from, and what is on its way.

(1) **Suppliers**
Active accounts, open orders, average lead time

(1) **Add supplier**
`/suppliers/new`

(2) **Supplier**
`/suppliers/:id`
Terms, contacts, order history

/settings

Settings

Your shop, your team, and your till.

(1) **Shop**
`/settings/shop`
Name, opening hours, collection shelf

(2) **Team and roles**
`/settings/team`
Invite staff, owner or bookseller

MAIN JOURNEYS

Fill an order — Today headline → Order → Check stock → Reserve a copy → Tell the customer → **Ready to collect**

Receive books — Stock → Receive delivery → **Back to stock, rows highlighted** or Upload invoice → Match columns → Review rows → Confirm

First run — Name your shop → Add or import stock → Add a supplier → **Take a first order**

CROSS-LINKS

An order opens its title in stock. A supplier opens its open orders, already filtered. The Today headline goes straight to the orders that need action.

OUTSIDE THE SECTIONS

Sign in. Customer-facing collection page (read only). Not found. Errors that name the supplier and what to try next.

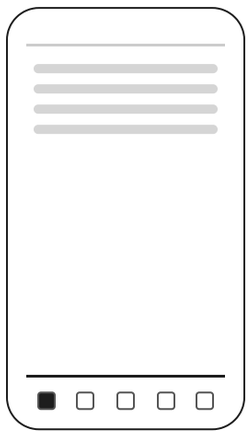

THE API NEEDS TWO ADDITIONS

1. List orders across every status with paging. 2. Stock lookup by ISBN that returns the shelf location.

HOW THE SAME STRUCTURE ADAPTS

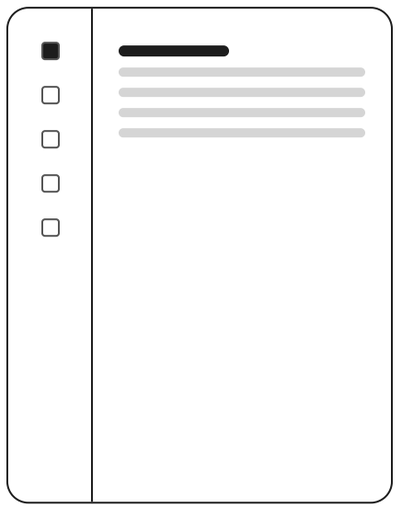

Navigation by screen size

Four breakpoints chosen around the devices booksellers actually use: a phone at the shelves, an iPad on the counter, a laptop in the back office. Nothing is the desktop shrunk.

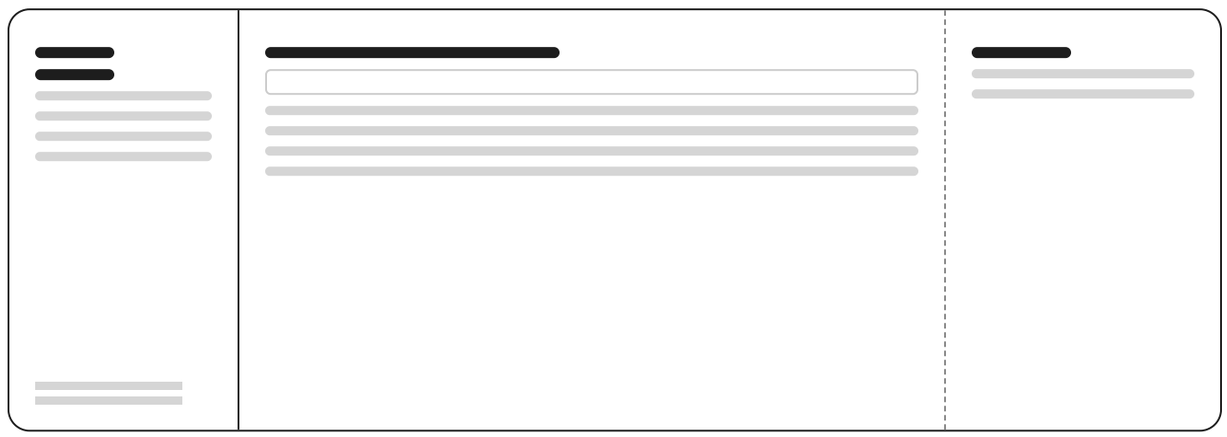

Phone · under 768

Bottom tab bar, five labelled tabs, reachable with a thumb. Page title and one primary action in the header.

Tablet · 768 to 1199

An 88 px rail, icon above label. Leaves the width for content on an iPad in portrait at the till.

Laptop 1200 to 1599 · Desktop 1600 and up

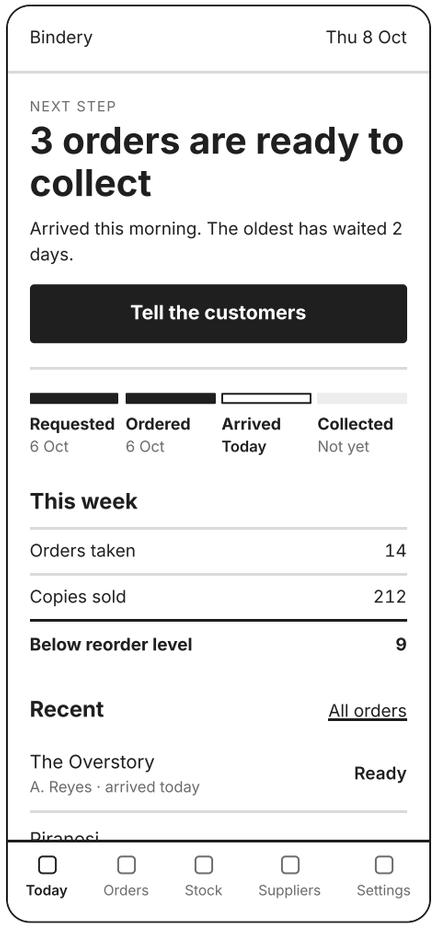

A 248 px sidebar with labels; its foot shows the shop and who is signed in. Detail opens in a right panel (dashed). On desktop the panel stays open and content is capped at 1280 px.

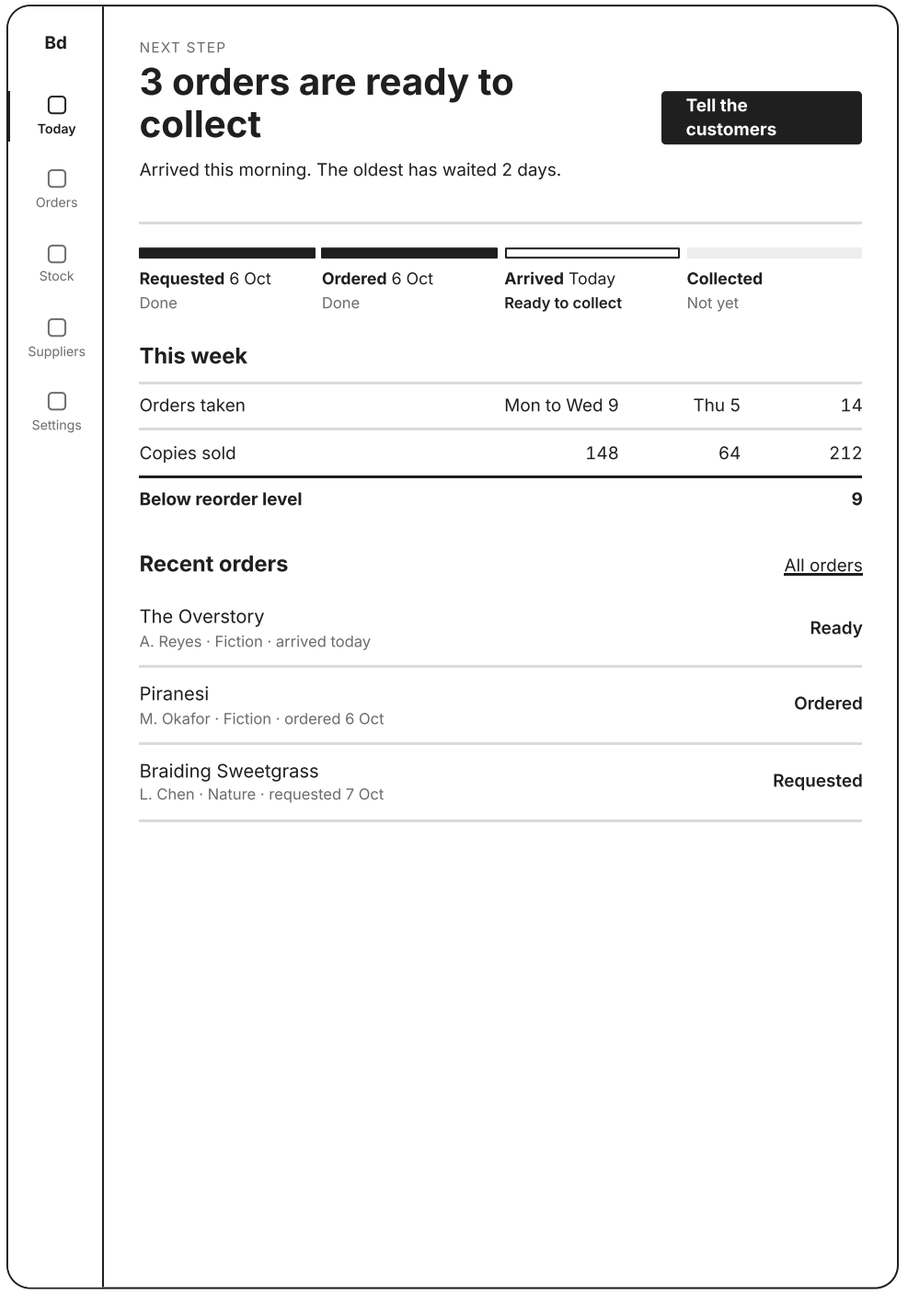

PATTERN	PHONE	TABLET	LAPTOP AND DESKTOP
Page actions	One primary action in the header; the rest in a More menu	Primary and one secondary action in the header	All actions in the header, primary rightmost
Stock and order tables	A list grouped by status or section; copies on the right	Four columns; supplier and location move to a second line	Full table with separate In stock and On order columns
Filters	Filters button opens a bottom sheet; active filters show as removable chips	Filters button opens a popover; chips below the search	Inline filter bar; every choice visible
Detail and edit	Full screen with a back button	Side sheet over the list	Right panel beside the table, which keeps its scroll position
Forms	One column, full width, action bar fixed to the bottom	One column, at most 560 px wide	One column, at most 560 px, in the panel or a page
Multi-step tasks	Full-screen task; tabs hidden; Exit at top left	A centred 640 px column with a step indicator; navigation hidden behind an Exit link so the task has the screen	

STEP 1 · WIREFRAMES · /

Today, phone and tablet

One headline action, then the order trail, then what changed. The tablet keeps the same order and gains a little room.

STEP 1 · WIREFRAMES · /STOCK

Stock, laptop

Filters always visible, a full table, and detail in the right panel so the table keeps its scroll position.

BINDERY · STEP 2 OF 3 · VISUAL SYSTEM

Bindery visual system

Warm paper, ruled lists instead of cards, one indigo for actions, and every order drawn as a trail.

Every text colour passes WCAG AA on white (checked by the generator). Status is always carried by words and shape as well as colour.

Colour

	Token	Used for	On white
	Ink #1E2230	Text, totals rule, finished steps	15.8 : 1
	Muted #565C6E	Secondary text, captions	6.7 : 1
	Indigo #2F3E8F	Primary actions, links, current step	9.5 : 1
	Indigo tint #E6E9F5	Selected row, current nav item	fill only
	Paper #F5F4EF	Navigation, sheets behind content	fill only
	Rule #D8DAE0	Row dividers; input borders use Muted	line only
	Amber #8A4B00	Low stock, waiting too long	6.8 : 1
	Red #A1262B	Errors and destructive actions only	7.4 : 1

Stock levels are never green and red. Low stock is a word ("Low") and an amber tag, never colour alone.
